

Master of Global Project Management

1. About the Master of Global Project Management

The Master of Global Project Management (MGPM) course is designed to create work-ready graduates who will contribute to the ever-growing role of a project management professional in the global digital economy. They will develop the cognitive, technical and creative skills to make effective project management business decisions in a global context and develop the leadership and team-building skills necessary to project manage in dynamic 21st century organisations. Graduates will develop the breadth of knowledge in advanced project management skills, requirements management and specialised applications of agile delivery approaches and global project management which impacts on contemporary businesses.

Graduates in this course will also acquire research skills to equip them to interpret and evaluate theoretical propositions and project management business-related data. This will maintain and promote the currency of your MGPM and culminates in a business capstone project where research skills are consolidated and applied to a strategic business problem. Students are encouraged to complete an industry placement through the capstone core subject to enhance employability.

The MGPM course will be facilitated via on-campus and online classes to allow students increased flexibility to meet the needs of the working professional and be immediately applicable to their current job and/or future career.

Subjects

1. PROJ6000 – Principles of Project Management

This subject introduces you to the practice of contemporary project management and its relevance in industry. You will be introduced to fundamental concepts of project management, project definition and project delivery methods. Contemporary project management methodologies will be examined in the context of industry best practice. An overview of industry standard tools and techniques required to manage projects successfully throughout a project life cycle will be provided. This includes industry terminology and the rationale behind the commencement of a project.

2. PROJ6002 – Project Planning and Budgeting

Understanding the relationships between operational factors and projects is a core skill to be effective in the project management landscape. This subject focuses on an in-depth understanding in project planning and budgeting. The project planning emphasises developing effective management plans for scope, time, cost, resources and quality to deliver successful projects. You will critically analyse and apply appropriate tools, techniques, processes and methods to create different plans and effectively communicate them to diverse groups of stakeholders.

3. PROJ6003 – Project Execution and Control

This subject will equip you with the knowledge and skills to manage projects and communicate objectives to diverse stakeholders. You will evaluate and apply a range of different tools, techniques and methods to monitor and control local and global projects. This includes managing changes, risks and quality, measuring project progress, and developing communication strategies to ensure that tasks are executed as planned for successful project completion.

4. PROJ6004 – Contracts and Procurement

Procurement and contracts are integral to successful project management. In this subject, you will learn how to plan for purchases and acquisitions, requests for proposal, vendor selection, contract administration, and contract closure. You will learn how to approach key issues with regard to short and long-term contracts, and

small and large contracts. Topics covered include the examination of procurement strategies, responsiveness, and supplier-client relationships. You will also examine tendering, bidding and order management processes, relevant legal and commercial implications, as well as managing the relationship between buyer and seller, assessing vendor performance, contract change control, and conflict resolution.

5. PROJ6017 – Integrated Project Management

In this subject, you will demonstrate advanced knowledge founded on application of the integrative nature of project management. You will deepen your knowledge and develop your skills to coordinate and implement various project change management processes and activities. You will apply advanced tools and techniques to holistically consolidate the project lifecycle within local and global contexts and evaluate enterprise environmental factors (EEF) influencing project outcomes and optimise project benefit realisation.

6. PROJ6018 – Project, Portfolio and Program Management

This subject consolidates your knowledge of project and program management concepts and introduces Project Portfolio Management. Specific topics include portfolio management lifecycles and frameworks, capability and capacity, project management maturity and change management. You will discuss the influence of the PMO in the successful delivery of projects and programs within the Project Portfolio.

You will also learn to select projects for inclusion in the portfolio and assess and evaluate the performance of the portfolio of projects and programs. Lastly there will be a focus on how to apply a range of tools and techniques when managing project portfolios, specifically considering strategic management, and benefits to the organisation.

7. MGT600 - Management, People and Teams

Understanding organisational behaviour, politics, dynamics and environments and how they impact on the role and legitimacy of management is the core of this subject. This subject introduces students to the constraints that managers and emerging leaders face in developing strategies to leverage advantages and overcome barriers in organisations and projects.

The subject focusses on developing advanced communication skills. Students will develop knowledge and skills to identify, analyse and make effective decisions to resolve people-related issues, facilitate employee development and sustain effective teams in complex and diverse global operating environments.

8. PROJ6016 – Project Management Capstone

The Project Management Capstone subject is the culmination of your learning and is designed to facilitate project-integrated practice to real world scenarios. This subject enables you to demonstrate your ability to think critically and strategically in order to apply contemporary project management methodologies within your chosen project. You will apply investigative and advanced concepts, theories and knowledge of project management practice to initiate a project that has real-world consequences, one that will make an impact on the profession in your chosen community or sphere of influence. The project is to be practical- or research based and to make a contribution to theory or practice.
