

Master of Global Project Management (Advanced)

1. About the Master of Global Project Management (Advanced)

The Master of Global Project Management (Advanced) (MGPMA) course is developed for students with multidisciplinary background, so as to equip them with specialised theoretical knowledge and practical skills in the field of project management. This program is designed to cultivate individuals skilled in project management with the cognitive, technical and creative skills to solve problems, manage risks and develop strategies in global organisational context. Students will also develop the leadership and teamwork skills necessary to apply effective project management practices in technical organisations. Increased breadth will be developed through the inclusion of foundational project management skills, innovation and entrepreneurship knowledge, delivery approaches as well as stakeholder management practices, all of which impact on contemporary organisations.

The course objective is to develop graduates who demonstrate a high level of strategic competence and strong ability to interpret information to solve project management problems globally. Graduates need to be able to work between various managerial teams in the organisation to translate needs and possible solutions. Graduates develop skills to determine what strategies to use when addressing and managing challenges faced by organisations. Students will also acquire skills in research and problem solving to use to maintain and develop their professional practice once in the workplace. Graduates are prepared to engage in ongoing self-reflection, self-directed learning and professional development activities.

The MGPMA course will be facilitated via on-campus and online classes to allow students increased flexibility to meet the needs of the working professional and be immediately applicable to their current job and/or future career.

Graduate employment opportunities

The potential employment opportunities may include, but are not limited to, the following roles within organisations across various industries:

An overview of industry standard tools and techniques required to manage projects successfully throughout a project life cycle will be provided. This includes industry terminology and the rationale behind the commencement of a project.</p>
<p>4. PROJ6002 – Project Planning and Budgeting</p> <p>Understanding the relationships between operational factors and projects is a core skill to be effective in the project management landscape. This subject focuses on an in-depth understanding in project planning and budgeting. The project planning emphasises developing effective management plans for scope, time, cost, resources and quality to deliver successful projects. You will critically analyse and apply appropriate tools,</p>

techniques, processes and methods to create different plans and effectively communicate them to diverse groups of stakeholders.

5. PROJ6003 – Project Execution and Control

This subject will equip you with the knowledge and skills to manage projects and communicate objectives to diverse stakeholders. You will evaluate and apply a range of different tools, techniques and methods to monitor and control local and global projects. This includes managing changes, risks and quality, measuring project progress, and developing communication strategies to ensure that tasks are executed as planned for successful project completion.

6. PROJ6004 – Contracts and Procurement

Procurement and contracts are integral to successful project management. In this subject, you will learn how to plan for purchases and acquisitions, requests for proposal, vendor selection, contract administration, and contract closure. You will learn how to approach key issues with regard to short and long-term contracts, and small and large contracts. Topics covered include the examination of procurement strategies, responsiveness, and supplier-client relationships. You will also examine tendering, bidding and order management processes, relevant legal and commercial implications, as well as managing the relationship between buyer and seller, assessing vendor performance, contract change control, and conflict resolution.

7. PROJ6017 – Integrated Project Management

In this subject, you will demonstrate advanced knowledge founded on application of the integrative nature of project management. You will deepen your knowledge and develop your skills to coordinate and implement various project change management processes and activities. You will apply advanced tools and techniques to holistically consolidate the project lifecycle within local and global contexts and evaluate enterprise environmental factors (EEF) influencing project outcomes and optimise project benefit realisation.

8. PROJ6018 – Project, Portfolio and Program Management

This subject introduces you to the nature and importance of concepts that go beyond The Triple Constraint of time, scope and cost. Specific topics include; portfolio management lifecycles; resource management; and change management. You will learn to assess and evaluate the performance of multiple projects and programs, and how to apply a range of tools and techniques when managing project portfolios, specifically considering strategic management, and benefits to the organisation.

9. MGT600 - Management, People and Teams

Understanding organisational behaviour, politics, dynamics and environments and how they impact on the role and legitimacy of management is the core of this subject. This subject introduces students to the constraints that managers and emerging leaders face in developing strategies to leverage advantages and overcome barriers in organisations and projects.

The subject focusses on developing advanced communication skills. Students will develop knowledge and skills to identify, analyse and make effective decisions to resolve people-related issues, facilitate employee development and sustain effective teams in complex and diverse global operating environments.

10. PROJ6016 – Project Management Capstone

The Project Management Capstone subject is the culmination of your learning and is designed to facilitate project-integrated practice to real world scenarios. This subject enables you to demonstrate your ability to think critically and strategically in order to apply contemporary project management methodologies within your chosen project. You will apply investigative and advanced concepts, theories and knowledge of project management practice to initiate a project that has real-world consequences, one that will make an impact on the profession in your chosen community or sphere of influence. The project is to be practical- or research based and to make a contribution to theory or practice.

Paying for your qualification

We offer two payment options for this course:

- **Upfront payment**
If you want to complete your qualification debt-free you can choose to pay as you go. This means tuition fees will be invoiced each semester and payment is required on or before the due date using EFTPOS, credit card or direct transfer.
- **FEE-HELP (Domestic students only)**
FEE-HELP is Australian Government's loan scheme for higher education degree courses. It can assist you in paying for all, or part of, your course fees. Repayments commence via the tax system once your income rises above a minimum threshold (\$45, 881 in 2019-20). Just like with any other debt, a FEE-HELP debt is a real debt that impacts your credit rating.
